## Customer Charter

We are committed to being the most helpful pathology service in the UK. Our goal is always to provide a high level of service to our customers, who request pathology services, for their patients.

We are medically led, and patients are our first concern. We always try to look to improve our operational expertise, and we strive to provide professional leadership within our specialities. We promise to provide easy access to our pathology services.

1. We will always provide a friendly, helpful service.
2. We aim to achieve, or improve, our published turnaround times.
3. Our laboratory team is available to provide additional clarification, advice or information for tests or results.
4. We promise to help you
5. We invest in technical and operational excellence, with an extensive test repertoire, to ensure access to a leading-edge laboratory service.
6. We return results in a safe matter.
7. We do our utmost to provide a service, even during extreme external disruptions beyond our control.
8. We are committed to our staff's continued professional development.
9. We have an organised programme to provide young people with work experience.
10. We aim to support our local community.
11. We promise to listen
12. We acknowledge customer issues and try to resolve them promptly and consistently.
13. If our delivery has been adversely affected, we will address and review our procedures so that our service reaches the highest standards.
14. We will actively ask for feedback so that we can continue to improve our service.

## Legal Entity

Phoenix Pathology is trading name of 9 Harley Street Ltd.  
Company number 06396281

## Location and Contact Information

25 Harley Street, W1G 9QW  
London, United Kingdom

+44 0207 079 2100 (option 3)

Email: [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk)

Website: <https://www.phoenixpathology.co.uk/>

## Laboratory Opening Hours

Monday to Friday 08:00 -20:00  
Closed on weekends and bank holidays

## Sample collection services / phlebotomy

Monday to Friday 08:00 -20:00

Appointments can be arranged by emailing: [appointments@phoenixhospitalgroup.com](mailto:appointments@phoenixhospitalgroup.com)

Name	Laboratory Guide 2022

## Helpful Information

The Laboratory Guide is designed to give you an easy-to-use reference for the most regularly requested services, pathology profiles and tests.

If you are not able to find details for tests and services, please contact the laboratory. We continue to develop a wide range of test and patient services and our aim is to offer commitment to customer service, strong working relationships and help and support for referring doctors and their practices.

## Complaints Policy

It is the aim of the company to maintain its core values. Two of these core values are:

- Commit to service excellence.
- Be enthusiastic about continuous improvement.

Where a doctor or patient needs to raise a complain, they should contact email Michel Pelisser (Head of Pathology Services) at [michel.pelisser@phoenixhospitalgroup.com](mailto:michel.pelisser@phoenixhospitalgroup.com) giving details of the complaint.

The information forwarded will be treated as confidential and investigated fully.

This process will link into Quality Management procedure for incident investigation. Corrective and preventative actions will be introduced where indicated.

## Service Level Agreement (SLA)

All users that wish to send samples to our laboratory must first have an agreement in place.

### Patient Request Form

Request forms that clinicians should complete are available in our website

<https://www.phoenixpathology.co.uk/>

To comply with good clinical practice, it is important specimens and form are correctly and fully labelled, to include three unique patient identifiers: First name, Surname, Date of birth, Hospital or Clinic number, Medical Record Number (MRN) are examples of patient identifiers.

The form must also contain the identification of the requester including full address and email to receive the results.

#### Other requirements to be fulfilled when ordering tests:

- Time and Date of collection of samples
- Type of sample and Anatomical site, where appropriate (e.g. swabs)
- Relevant clinical information
- Relevant details of medication
- High Risk Samples should be clearly identified on the form and individually packed separately from other samples
- Hazard Group 4 pathogens (such as Ebola or Viral Haemorrhagic Fever) must **not** be sent to the laboratory.

## Sample collection guide

All samples must be collected following our sample collection guide.

Please visit our website:

<https://www.phoenixpathology.co.uk>

## Sample add-ons

Most samples received in the laboratory are kept for one week. If sample type, stability and volume allow, further testing can be requested by email to [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk).

Please email the add-on test required together with patient details, laboratory number and collection date. Further information may be required to ensure the correct test can be performed in the correct sample.

## Genetic consent forms

Genetic tests require a consent form. Please email [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk) to request

## Sample Stability

Stability of each test can be requested by emailing [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk)

## Patient reference ranges

Patient reference ranges for each test can be requested by emailing [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk)

## Sample Packing and Transport

Phoenix Pathology uses ISO accredited medical couriers to collect samples from clinics. Samples may need to be transported for subsequent processing and testing. Transport systems will be various and cover both long or short distances.

Samples need to be collected and packed into appropriate sample containers provided by the laboratory in order to maintain integrity of the sample(s). Attention needs to be given to temperature, special transport containers and time limitations.

Clinics, practices and laboratories who are posting or transporting samples by air, sea, rail and road between local, regional and reference laboratories, or between laboratories in other countries, must adhere to a number of regulations. These regulations are designed to deal with transportation accidents and spills, reduce biohazards and keep samples intact for testing. Regulations are given by several sources including:

- National transport regulations
- IATA
- Rail and road traffic agencies
- Postal services

Compliance is mandatory in order to reduce risk to couriers, carrier, laboratory staff and passengers. Sample transport requirements are based on the category of samples being transported. Infectious substances are classified as Category A or Category B.

Phoenix Pathology does not arrange for transport of Category A samples (infectious substances capable of causing permanent disability or life threatening or fatal disease to humans or animals). Instruction and packaging for Category B is provided, covering Biological Substances, UN number UN 3373.

Name	Laboratory Guide 2022

Version	2.3	Author	Sam Jones
Date of Issue	01/02/2022	Authoriser	Michel Pelisser
Date of Review	See Q-Pulse	Page	Page 7 of 56

## Packaging Requirements

There are specific packaging instructions and labelling requirements requiring triple packaging.

- Primary leak-proof container – tube or vial containing the sample
- Secondary watertight container, with absorbent material, intended to protect the primary container
- Outer container protects the secondary container

There are specific packaging instructions for frozen samples requiring shipment using BioFreeze bottles, or Dry Ice. For information please contact the laboratory on [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk).

## Postal Pathology

Phoenix Pathology Postal services should be considered by doctors in the UK who need a personal and rapid results service. Turnaround times for specific tests are detailed in this laboratory guide and are quoted from the time of receipt in the laboratory.

Please note only specific tests can be posted. Email [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk) for more details.

## Pathology Consumables

Our laboratory provides all appropriate sample collection consumables required for sample collection provided you have a service level agreement with us.

Orders can be made email [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk).

Name	Laboratory Guide 2022		
Q Pulse ID	LAB-EXT-1	Copy Location	See Q-pulse
Version	2.3	Author	Sam Jones
Date of Issue	01/02/2022	Authoriser	Michel Pelisser
Date of Review	See Q-Pulse	Page	Page 8 of 56

## Type of Primary Samples Received/Report Content

It is an ISO 15189:2012 requirement that the type of samples received in the laboratory are shown in the laboratory report. Phoenix Pathology reports will not show this information for referral tests; however, this information is readily available with the laboratory team. If you require this information, please contact us at [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk).

## Requesting and Reporting Options

Please contact [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk) for us to review your requirements if required.

## Printed Copy Results

Phoenix Pathology is an environmentally friendly laboratory and no printed copy of results is provided.

## Fees for Pathology

Fees can be paid directly by patients or by the practice, clinic or requesting organisation. A payment instruction clearly identifying to whom invoices need to be sent must be given with each patient's request. Patients are normally invoiced within 7 days to the address provided by the patient or practice. Their pathology fees include a standard credit/administration charge.

Receipts for insurance purposes are sent, if requested. Patients visiting 25 Harley Street for sample taking can settle their pathology fees at the time of their visit. A credit/administration fee is raised for invoices sent to patients

## Protection of Personally Identifiable Information

The General Data Protection Regulation (GDPR) came in to force in May 2018 and has had a significant impact upon the way that personal data is managed; placing legal requirements upon data processors and controllers to manage that information securely, maintain records of the processing that is carried out, and report when breaches of the regulation do occur. This has impacted the way many businesses operate and is not restricted to the healthcare sector. The GDPR requirements have been implemented within the context of a mature ISO 27001 Information Security Management System – the globally accepted standard by which information is secured. This ensures that senior management have regular visibility of the threats to the confidentiality, availability and integrity of the information that we process, and are able to steer the efforts of their teams to provide an efficient service that places the confidentiality of our customers and their patients at the heart of everything we do. In order to support our customers compliance with the regulation and as a part of a wider GDPR compliance project Phoenix Pathology has updated its standard terms and conditions to include revised data processing clauses, which are mandatory when providing personal data to another organisation.

## Quality Assurance

Phoenix Pathology is committed to providing doctors with pathology of the highest quality. The quality of results is of fundamental importance and the laboratory operates to stringent technical and administrative standards.

Internal quality assurance is achieved by strict adherence to standard operating procedures for all analytical processes. Phoenix Pathology participates in recognised National External Quality Assessment Schemes.

Name	Laboratory Guide 2022		
Q Pulse ID	LAB-EXT-1	Copy Location	See Q-pulse
Version	2.3	Author	Sam Jones
Date of Issue	01/02/2022	Authoriser	Michel Pelisser
Date of Review	See Q-Pulse	Page	Page 10 of 56

These schemes are subscribed to by NHS and private laboratories. Results are subjected to strict internal and external quality control. Details of the laboratories to whom Phoenix Pathology refers specialist testing are available from on request. These laboratories are UKAS accredited where possible or of equal accreditation status.

Our quality policy can be found in our website.

## Measurement Uncertainty

Evaluating measurement uncertainty is an ISO 15189:2012 accreditation requirement.

Medical laboratories are responsible for ensuring that test results are fit for clinical application by defining analytical performance goals and selecting appropriate measurement procedures. All types of measurement have some inaccuracy due to bias and imprecision; therefore, measurement results can only be estimates of the values of the quantities being measured. To properly use such results, medical laboratories and their clinical users need some knowledge of the accuracy of such estimates.

Overall assay performance is also regularly monitored through internal quality control (IQC) and external quality assessment (EQA) schemes and incorporated in test result interpretation. MU for individual assays is available upon request.

## Sample acceptance protocol

### Our expectations of service users

Service users are responsible for ensuring that samples are unequivocally traceable by the request and labelling, to an identified patient and facility.

Services users must also ensure that all of the below points are followed:

- i. The patient must be correctly identified at the time of the sample taking.
- ii. When phlebotomy is required for sample collection, the correct phlebotomy order of draw must be followed.
- iii. Full information must be provided on request forms. This includes 3 patient identifiers (surname, name, date of birth and patient ID) and also clinical details and any other information that will ensure that the correct tests and follow up tests are performed as required.
- iv. Where electronic requesting is used, the service user must ensure that the exact process of ordering of paper request forms takes place before any samples are sent off for testing.
- v. Samples must be taken following sample requirements and instructions.
- vi. Blood transfusion sample labels must be handwritten, and the request form and samples must contain signature of the person collecting the sample.
- vii. Samples must be taken into the correct containers and be filled to the correct levels. The laboratory must be contacted if this cannot be done and they will advise as to whether alternatives would be acceptable.
- viii. Specimens must be correctly packaged, preserved and transported in a timely manner to the laboratory for testing. The laboratory must be contacted if this cannot be done and they will advise as to whether alternatives would be acceptable.
- ix. The sample container must be sealed in order to prevent spillage. Failure to do so may result in loss of sample.
- x. The sample must arrive in the laboratory with acceptable quality for testing.

## Expectation from our service users

Provided all the expectations above are fully met, the service users can in return expect the following levels of service from the laboratories.

- i. Requests and tests will be received, registered and processed by trained and competent laboratory staff.
- ii. Examination testing will be performed by trained and competent laboratory staff.
- iii. Validation of examination testing will be performed by qualified and competent Biomedical Scientist.
- iv. Authorisation of examination results will be performed by registered, qualified and competent Biomedical Scientist.
- v. Where appropriate, scientific/technical interpretation will be given verbally and/or in writing by a qualified Chemical Pathologist.
- vi. Where appropriate, clinical advice and interpretation will be given verbally and/or in writing by qualified and competent clinical or medical practitioners.
- vii. Where appropriate, medical advice and interpretation will be given verbally and/or in writing by qualified Medical Practitioners.
- viii. Laboratory will ensure high quality of examination testing that will be subjected to continued external proficiency testing and regulatory assessment.
- ix. The laboratory will provide instructions and advice to service users through Web services.
- x. The laboratory will try its best to make results available to service users within agreed turnaround times stated on the Phoenix Pathology Guidebook. Service users will be notified, where appropriate of any circumstances that adversely affect this.
- xi. The laboratory will inform service users as quickly as possible of circumstances that could impact on the reliability of examination results.
- xii. The laboratory will inform services users of any changes to sample requirements or testing processes that impact on examination results and/or reference ranges.
- xiii. Laboratory Management will maintain processes that ensure and test on going competence of all grades of staff employed.
- xiv. When samples are rejected the laboratory shall issue a report that details the reason(s). Where the request is deemed to be urgent the communication may also be by telephone.

Name	Laboratory Guide 2022

## Sample rejection criteria

Sometimes tests cannot be performed in the laboratory if samples fall short of the quality, volume or other eligibility criteria. In these cases, the laboratory may need to reject the samples, and not carry out processing. Sometimes the laboratory is able to rectify a situation – and although turnaround times may be affected, it avoids having to arrange for samples to be taken again.

### Summary List for Sample Rejection

- Incorrect sample types received:
- Samples without the appropriate preservative (e.g. acidified urine samples).
- Samples that are received ambient, when a frozen sample is required.
- Samples that are received unprotected from light, when they are required to be covered at the point of venepuncture.
- Samples in incorrect containers (e.g. cervical cytology must be a ThinPrep vial; urine cytology must be in a uricyte container).
- Insufficient sample received.
- No sample received.
- Labelling or form issues (mislabelled / unlabelled / no forms/ no clinical information).
- Clotted / haemolysed /lipaemic /icteric samples.
- Sample is broken or has leaked in transit.
- Stability time has been exceeded. Stability time is test dependant, and also refers to tests that can only be carried out on certain days of the week sample contamination (e.g. being in the same bag as a leaking sample).
- Samples are high risk or infectious.
- Samples that are received in expired tubes.

Name	Laboratory Guide 2022

**Department Specific**

- Sample Reception will not accept samples packaged with needles of any kind.
- Haematology cannot accept frozen whole blood for testing.
- Blood Transfusion will not accept samples with a label. All samples must be hand-written with patient details, date and time of collection and signature of the sample collector.
- Coagulation cannot accept over or under filled samples for testing.
- Coagulation cannot accept previously frozen samples that have thawed in transit.
- Biochemistry cannot accept previously frozen samples that have thawed in transit.
- Biochemistry cannot accept samples that display antibody interference.
- Biochemistry cannot accept samples that have had separation delays/un-centrifuged samples that have been stored in the fridge.
- Biochemistry cannot accept paraprotein resulting in viscous samples.
- Biochemistry cannot accept CSF protein that is blood stained.
- Immunology cannot accept TBQ kits that:
  -  Do not contain all of the appropriate tubes.
  -  Are incubated for more than the specified 16 hours.
  -  Have passed the incubation time period.
  -  Are over or under filled.
- Microbiology cannot accept samples in non-sterile containers or in formalin.
- We cannot accept samples without three points of identification for DRP testing.
- Referrals cannot accept samples that are not labelled by hand for blood group testing.
- Molecular Pathology cannot accept samples for Haemophilia testing without informed consent.
- Cervical Cytology cannot accept over or under filled samples for testing.
- Cervical Cytology cannot accept samples received within three months of the previous test in order to allow epithelial cells to regenerate.
- Urine cytology cannot accept delayed samples unless they have been refrigerated.

Name	Laboratory Guide 2022		
Q Pulse ID	LAB-EXT-1	Copy Location	See Q-pulse
Version	2.3	Author	Sam Jones
Date of Issue	01/02/2022	Authoriser	Michel Pelisser
Date of Review	See Q-Pulse	Page	Page 15 of 56

- Samples deemed to be PRECIOUS (e.g. CSF, fluid, tissue, bone marrow and paediatric samples) will not be discarded by the laboratory. Results will include a comment relating to the condition of the sample (e.g. sample unlabelled).
- 

## Clinical Advice

For users that require clinical advice or professional support, please contact [info@phoenixpathology.co.uk](mailto:info@phoenixpathology.co.uk) and we will arrange our advisory service to contact you.

## Sample Types:

Vacutainer	Anticoagulant	Capacity	Sample types
Lavender	EDTA	4ml /10ml*	<b>A</b>
Gold	SST/Gel	3.5ml, 5ml	<b>B</b>
Light Blue	Citrate	4.5ml	<b>C</b>
Red	None	6ml	<b>F</b>
Grey	Fluoride oxalate	2ml, 4ml	<b>G</b>
Green	Lithium heparin	6ml	<b>H</b>
Dark Blue	Sodium heparin	7ml	<b>K</b>
Streck Cyto-chex BCT Vacutainers for lymphocyte subsets (CD3/CD4/CD8) (stable for up to 7 days). They are not suitable for other CD markers.			Chex
Blood culture bottle: contact laboratory			BC
Contact laboratory for advice on sample taking			J
Test by appointment			X
Random faeces			RF
Faecal collection			LF
Random urine			RU
First Catch Random Urine (for DL12/Chlamydia, etc.)			FCRU
30ml aliquot from a 24-hour urine collection – state total volume			CU
30ml aliquot from a 24-hour urine collection with 10ml of 0.1N hydrochloric acid added – state total volume			PU
Early Morning Urine (1st sample of the day)			EMU
Sterile 60ml container			SC
Cytoc Thin Prep Vial			TPV
Orange/Blue swab for culture – swab in transport medium			STM
Black charcoal swab			CS
Green viral swab			VS
PCR swab for Chlamydia/PCR Infection Screening			PCR
Tap/bottled water mouth wash – 20mls			MW
Amniotic fluid (5mls PCR – 10mls Karyotype)			AF
Chorionic villus (medium provided by laboratory)			CVS
Urine cytology container			UCYT
* 10ml EDTA tubes are used for specific PCR assays.			

Name	Laboratory Guide 2022

Sample instructions

<b>1</b>	Contact the laboratory for special sample tubes/containers/instructions.
<b>2</b>	Confirmation of not negative drug screens by GCMS may take up to 5 days.
<b>3</b>	Clinical history essential and protect from light.
<b>4</b>	Send to the laboratory without delay.
<b>5</b>	Do not send sample to the laboratory between Friday noon and Monday morning.
<b>6</b>	Contact the Referrals Department before taking and sending sample to the laboratory.
<b>7</b>	Sample should be separated and frozen if sending overnight.
<b>8</b>	DRP Form required. Please contact laboratory to receive DRP Form.
<b>9</b>	Clinical history must be provided.
<b>10</b>	Contact the laboratory for special stability tubes for lymphocyte subsets – or take an EDTA sample and ensure same day delivery to the laboratory, Monday to Friday noon (do not send sample between Friday noon and Monday morning).
<b>11</b>	Patient consent required. Consent Form can be found at the back of this guide.
<b>12</b>	Please provide one sample for each person being tested.
<b>13</b>	Protect from light.
<b>14</b>	Provide details of travel history.
<b>15</b>	Ammonia. Sample: EDTA plasma only. Full tubes and tightly stoppered. On ice, centrifuged and analysed 20-30 mins post venepuncture (or plasma can be frozen). If haemolysed gives falsely high results. Patient:
<b>16</b>	Lactate. Sample: Fluoride oxalate plasma only. On ice and separate from cells 15-30 mins, analyse promptly. Handle with care as sweat contains large amounts of lactate. No tourniquet. Patient: Rest 30 mins prior to test.
<b>17</b>	Homocysteine. Should be spun and separated with 1 hour of venepuncture.
<b>18</b>	Citrate Samples. Samples should be double spun and separated and frozen within 4-8 hours of sample taking, if a delay is expected with transportation to the laboratory, samples must be transported as frozen.
<b>19</b>	Must include patient's age, height and weight.
<b>20</b>	Sample types: FCRU or PCR swab or TPV or Semen.
<b>21</b>	Urine cytology container, ideally first catch, mid-morning specimen.
<b>22</b>	Must be fresh.
<b>30</b>	Collect sample at end of exposure.
<b>33</b>	Sample must be labelled by hand with first name, family name, gender and date of birth detailed on sample and form. Do not use labels other than the tube label.
<b>34</b>	Samples must arrive in the laboratory on the same day of sample taking or contact the laboratory.
<b>35</b>	Patient should be fasting and resting for 30 mins before sample taking. Samples need handling urgently.
<b>36</b>	Renin: Sample collected either upright /active or resting /supine (3 hrs lying).
<b>37</b>	Provide sample time and date of collection.
<b>38</b>	EDTA sample should not be separated: send whole blood.

Amitriptyline	AMTR	A [4]	5 days **
Ammonia	AMMO	A (Frozen) [15]	4 hrs **
Amniocentesis – rapid BOBs aneuploidy diagnosis for all chromosomes (5 days) + culture (10-15 days)	ABK	AF [9]	5-15 days **
Amniocentesis – rapid PCR diagnosis for common aneuploidies (2 days) + culture (10-15 days)	APCC	AF [9]	2-15 days **
Amoebic (E. histolytica) Antibodies	AFAT	B	2 days **
Amoebic (E. histolytica) Antigen	AMAG	RF	2 days **
Amylase	AMY	B	4 hrs **
Anaemia Check	AC	B, A	24 hrs
Anaemia Profile	ANAE	A, A, B	24 hrs
Anafranil (Clomipramine)	CHLO	A	7 days **
ANCA (Anti-Neutrophil Cytoplasmic Abs)	ANCA	B	2 days **
Andropause Profile	ANDP	B, B	8 hrs **
Androstenedione	ANDR	B (Frozen)	1 day
Angiotensin Converting Enzyme	ACE	B	4 hrs **
Antenatal Profile	ANTE	A, A [33] B, B, B, G	3 days **
Anti CCP Antibodies (RF)	CCP	B	2 days **
Anti Sla (Soluble Liver Antigen) Abs	LSA	B	10 days **
Anti-Ri Antibodies	RIAB	B	3 days **
Antimullerian Hormone [Elecsys/Roche]	AMH	B	4 hrs **
Antinuclear Antibodies (titre & pattern)	ANAB	B	2 days **
Antioxidant Status (total/activity)	FRAD	B	7 days **
Antistaphylolysin Titre (SGOT)	ASTT	B	2 days **
Antistreptolysin Titre/ASOT	ASLT	B	2 days **
Antithrombin III	A111	C (Frozen) [4,9,18]	3 days **
Apolipoprotein A1 (12 hrs fasting)	APOA	B	3 days **
Apolipoprotein B (12 hrs fasting)	APOB	B	3 days **
Apolipoprotein E	APOE	B (fasting)	5 days **

Chlamydia/Gonorrhoea (PCR Swab)	SCG	PCR	2 days **
Chlamydia/Gonorrhoea (Rectal)	RSCG	PCR	2 days **
Chlamydia/Gonorrhoea (Thin Prep)	TCG	TPV	5 days **
Chlamydia/Gonorrhoea (Throat)	TSCG	PCR	2 days **
Chlamydia/Gonorrhoea (Urine)	CCG	FCRU	2 days **
Chlamydia/Gonorrhoea/Trichomonas by PCR	CCGT	FCRU / PCR / TPV	2 days **
Chloride	CL	B	24 hrs
Cholesterol	CHO	B	24 hrs
Cholesterol (Familial Hypercholesterolaemia)	GENE	A, A [9]	4 weeks **
Cholinesterase (Blood)	CHRC	H	5 days **
Cholinesterase (Serum/Pseudo)	CHPS	B	3 days **
Chromium (Blood)	CHRO	A	5 days **
Chromium (Urine)	URCR	RU [30]	5 days **
Chromosome Analysis (Amniocentesis) – culture only	ACUL	AF [9]	10-15 days **
Chromosome Analysis (Amniocentesis) – rapid BOBs aneuploidy diagnosis for all chromosomes (5 days) + culture (10-15 days)	ABK	AF [9]	5-15 days **
Chromosome Analysis (Amniocentesis) – rapid PCR diagnosis for common aneuploidies (2 days) + culture (10-15 days)	APCC	AF [9]	2-15 days **
Chromosome Analysis (Blood)	KARY	H [9]	5-15 days **
Chromosome Analysis (Bone Marrow) – please send with complete Leukaemic Studies Request form at back of guide	CBMA	A, H [9,11] Contact lab	5-20 days **
Chromosome Analysis (Chorionic Villus) – rapid BOBs aneuploidy diagnosis for all chromosomes (5 days) + culture (10-15 days)	CBK	CVS [9]	5-15 days **
Chromosome Analysis (Chorionic Villus) – rapid PCR diagnosis for common aneuploidies (2 days) + culture (10-15 days)	CVPC	CVS [1,9]	2-15 days **
Chromosome Analysis (Chorionic Villus) – culture only	CVSC	CVS [1,9]	10-15 days **
Chromosome Analysis (Product of Conception) – BOBs rapid aneuploidy diagnosis for all chromosomes (5 days) + culture (25 days)	PBK	Placental Sample [1,9]	5-25 days **
Chromosome Analysis (Products of Conception)	PROC	Placental Sample [1,9]	20-25 days **
Chromosome Analysis (Slide for opinion)	CHSL	Slide [9]	Contact lab
Chromosome Analysis (Solid Tissue)	PROC	Fetal tissue [1,9]	4-5 weeks **
Chromosome Y Deletion – AZFa, AZFb, AZFc + SRY	YDEL	A [9]	5 days **
Chronic Fatigue Syndrome Profile	VIP1	A or Chex + B [10]	5 days **

PLAC Test (Lp-PLA2)	PLA2	B	2 days **
Plasma Viscosity	VISC	A [4]	3 days **
Pleural Fluid for Culture	FLUP	SC	7 days **
Pneumococcal Antibody Screen	PNEU	B	7 days **
Pneumococcal Antigen	PNAG	RU	1 day
Pneumocystis Examination	PCYS	BAL*	1 day
Pneumonia (Atypical) Screen	APS	B	2 days **
Polcalcins	ZZ25	B	2 days **
Polio Virus 1, 2, 3 Antibodies	POLO	B [9]	5 days **
Polycystic Ovary Syndrome Profile	PCOP	A, B, B, B, G [7]	5 days **
Porphyrin (Blood)	PORP	A [3]	15 days **
Porphyryns (Faeces)	FPOR	RF [3]	15 days **
Porphyryns Screen (Total: Urine, Stool, Blood)	PORS	A, RU, RF [3]	15 days **
Porphyryns Screen (Urine)	RPOR	RU [3]	15 days **
Post Exposure Prophylaxis Bloods (PEPs) (FBC, LFT, U/E, CA, Phos, LIPP, Glucose )	PEPS	B, G	4 hrs **
Post-Travel Screen 1	PTS	A, A, B, G [14]	10 days **
Post-Travel Screen 2	PTS2	A, A, B, B, B, G [14]	10 days **
Postnatal array CGH	CGH	A, H [9]	10 days **
Potassium	K	B	24 hrs
PR-10 Proteins	ZZ22	B	2 days **
Prader-Willi Syndrome (Primary Screen) – methylation PCR	PWAM	A [9]	5 days **
Pre-eclampsia Screen	PREM	B	3 days **
Pre-Travel Screen (DVT)	DVT1	A, A, B [9]	5 days **
Pregnancy (Serum) [Quantitative]	QHCG	B	24 hrs
Pregnancy Test (Urine)	PREG	RU	4 hrs **
Pregnenolone	PREN	B	15 days **
Prenatal array CGH	CGH	Amniotic fluid or CVS [9]	10 days **

Primidone (Mysoline)	PRIM	B [4]	3 days **
Procalcitonin	PCAL	B (Frozen) [4,7]	1 day
Product of Conception – rapid BOBs aneuploidy diagnosis for all chromosomes (5 days) + culture (25 days)	PBK	Placental Sample [1,9]	5-25 days **
Product of Conception BOBs only – rapid aneuploidy diagnosis for all chromosomes	KBOB	Placental Sample or Solid Tissue [1,9]	3-6 days **
Profilins	ZZ24	B	2 days **
Progesterone	PROG	B	4 hrs **
Proinsulin	PROI	B (Frozen)	5 days **
Prolactin	PROL	B	24 hrs
Prolactin (Macro)	PRLD	B	4 days **
Propranolol	PRO	B [4]	7 days **
Propoxyphene	DPRO	RU	5 days **
Prostate Profile (Total & Free PSA)	PR2	B	24 hrs
Prostate Specific Antigen (Total)*	PSPA	B	24 hrs
Protein (Urine)	UPRT	CU	4 hrs **
Protein C	PRC	C (Frozen) [4,9,18]	3 days **
Protein Electrophoresis	PRTE	B	2-4 days **
Protein S Free Ag	FPRS	C (Frozen) [4,9,18]	3 days **
Protein Total (Blood)	PROT	B	24 hrs
Protein/Creatinine Ratio (Urine)	UCPR	RU	4 hrs **
Proteinase 3 Ab	PR3	B	2 days **
Prothrombin Time	PTIM	C [18]	4 hrs **
Prothrombin Time + Dose	PT+D	C [18]	4 hrs **
<b>Q</b>			
Q Fever (C Burnetti) Antibodies	QFEV	B [9]	3 days **
QF-PCR rapid common aneuploidy screen	APC	AF/ A [9]	1-2 days **
<b>R</b>			
Rabies Antibody	RABI	B	10 days **

Semen Analysis, Comprehensive	SPER	Semen [1]	2 days ***
Semen Analysis, Post-Vasectomy	PVAS	Semen [1]	2 days **
Semen Analysis, Vasectomy Reversal	SPER	Semen [1]	2 days ***
Semen Culture	SPCU	Semen	2-3 days **
Semen Fructose	SPCF	Semen	2 days **
Semen Leucocytes	PMNS	Semen	2 days **
Semen Parameters	SPOD	Semen [1]	1 day
Serotonin	SERT	H (Frozen whole blood) [1]	10 days **
Serum Albumins	ZZ30	B	2 days **
Sex Hormone Binding Globulin	SHBG	B	24 hrs
Sexual Health Check	VIRO	B	24 hrs
Shigella Abs	SHIG	B	5 days **
Shrimp Components	ZZ17	B	2 days **
Sickle Cells	HBEL	A	4 days **
Silver (Blood)	SILV	B	5 days **
Silver (Urine)	USIL	RU	5 days **
Sinequan (Doxepin)	DOXE	A	10 days **
Sirolimus	SIRO	A	3 days **
Sjogren's Syndrome	RH7	B	2 days **
Skin (Pemphigus/Pemphigoid) Autoantibodies	SKAB	B	2 days **
Skin Scrapings/Mycology	SKSC	Send Sample	3-4 weeks **
Skin/Mucosal Swab – Viral PCR	VPSK	PCR	5 days **
Smith-Magenis Syndrome – BOBs (5 days) + karyotype (15 days)	PBOB, KARY	CVS/AF/A, H [9]	5-15 days **
Smith-Magenis Syndrome – BoBs only	PBOB	CVS/AF/A [9]	5 days **
Smooth Muscle Antibodies	ASMO	B	2 days **
Sodium	NA	B	24 hrs
Somatomedin (IGF-1)	SOMA	B (Frozen) [4]	1 day

Soybean Components	ZZ18	B	2 days **
Specific Gravity (Urine)	USG	RU	8 hrs **
Sperm Aneuploidy (FISH)	SPPL	Semen [1]	2 weeks **
Sperm Antibodies (Serum)	ASAB	B	5 days **
Sperm Antibodies /MAR Test (Semen)	ASPA	Semen	1 day
Sperm DNA Fragmentation (SCSA)	SEXT	Semen [1]	2-3 weeks **
Sperm Morphology (Kruger strict criteria)	MRPH	Semen [1]	2 days **
Spinal Muscular Atrophy – SMN1 deletions/duplications	SMA	A [9]	3 weeks **
Sports/Performance Profile	SPOR	A, A, A, B, B, B, B, G, K [4]	5 days **
Sputum for Routine Culture	SPU1	SC	2-3 days **
Sputum for TB Culture (AFB)	SPU2	SC	up to 8 weeks **
Squamous Cell Carcinoma	SCC	B	4 days **
SRY (Sex-determining Region Y)	SRY	A [9]	2 days **
STD1 M/F STD Quad	STD1	B, FCRU	2 days **
STD2 M/F STI Profile Plus (Urine and Serology)	STD2	B, FCRU (If culture swabs are needed please request separately)	4 days **
STD3 Female STD Quad (PCR Swab and Serology)	STD3	B, PCR	2 days **
STD4 Female STI Profile Plus (PCR Swab and Serology)	STD4	B, PCR (If culture swabs are needed please request separately)	4 days **
STD5 Serology only	STD5	B	24 hrs
STD6 Serology only without HIV	STD6	B	24 hrs
STD8 Vaginitis/BV Profile using Culture & PCR Swab	STD8	PCR, STM	3 days **
STD9 Symptomatic lesion sample using PCR Swab from lesion	STD9	PCR	7 days **
Steroid Cell Antibody	SCA	B	2 days **
Stool for OCP and Culture	SPAR	RF	2-3 days **
Stool for OVA Cysts & Parasites	OCP	RF	1 day
Streptomycin Levels	STRM	F	5 days **
Striated/Skeletal Muscle Antibody	STRA	B	2 days **

Sulpiride	SULP	B [4]	4 days **
Suppression with steroid, IVIg and intralipin, NK (CD69) cell assay, TH1/TH2 cytokines	NCIT	H, H, H [5,34]	Send Mon-Thurs only
Swab for Culture (Any Site)	SWAB	STM	2 days **
Synacthen Stimulation Test	SYNA	X	4 hrs **
Synovial Fluid (For Crystals)	FLU2	SC	1 day
Syphilis by PCR (chancre)	SYPS	PCR	5 days **
Syphilis IgG/IgM	SERJ	B	24 hrs
<b>T</b>			
T3	T3	B	4 hrs **
T3 (Reverse)	RT3	B [7,37]	10 days **
Tacrolimus/Prograf (FK506)	FK5	A [4]	1-2 days **
TB (pleuralfluid)	TBCU	SC	up to 8 weeks **
TB Culture	SPU2	SC	up to 8 weeks **
TB Culture (Urine)	TBUR	3x EMU	up to 8 weeks **
TB Quantiferon®-TB Gold	TBQ4	J / special tubes [1]	3 days **
TB Slopes – Confirmation and Sensitivity	TBSL	TB slope (LJ medium-green) [6]	up to 8 weeks **
Tegretol (Carbamazepine)	CARB	B	4 hrs **
Teicoplanin Assay	TEIC	B	5 days **
Temazepam	TEMA	B [4]	4 days **
Testicular Autoantibodies	TAB	B	2 days **
Testicular Tumour Profile	TTP	B	4 hrs **
Testosterone	TEST	B	24 hrs
Testosterone (Free)	FTES	B	3 days **
Tetanus Screen	TETA	B	5 days **
TH1/TH2 cytokine profile	1TH2	H, H, H [5,34]	Send Mon-Thurs only
TH1/TH2 Cytokine Ratio	6RF	H, H, H [5]	1 week
Thalassaemia Screen	HBEL	A	4 days **

Theophylline	THEO	B	4 hrs **
Thiopurine Methyl Transferase	TPMT	A [5]	5 days **
Thrombotic Risk Profile	PROP	A, A, B, C, C, C [18]	5 days **
Thyroglobulin Abs	TGAB	B	1 day
Thyroglobulin Assay	TGA	B	1 day
Thyroid Abs (incl. Thyroglobulin + Thyroid Peroxidase Abs)	THAB	B	1 day
Thyroid monitoring	TM	B	24 hours
Thyroid Peroxidase Antibodies/Anti TPO	TPEX	B	1 day
Thyroid Profile 1	TF	B	24 hrs
Thyroid Profile 2	TF2	B	2 days **
Thyroid Profile 3	TF3	B	24 hrs
Thyroxine (T4)	T4	B	4 hrs **
Timothy Grass Components	ZZ19	B	2 days **
Tissue for culture	TISS	Tissue sample	up to 7 days **
Tissue Transglutaminase IgA (Coeliac)	TAA	B	2 days **
Tissue Transglutaminase IgG	TAAG	B	5 days **
Tobramycin Assay (Provide Clinical Details)	TOBR	B	3 days **
Topiramate (Topamax)	TOPI	B [4]	4 days **
Torch Screen	TORC	B	2 days **
Total IgE	IGE	B	1 day
Toxoplasma Antibodies (IgG+IgM)	TFAM	B [9]	4 hrs **
TPPA (TPHA)	TPPA	B	2 days **
Trace Metal (Blood) Profile	TRAC	B, H, K	7-10 days **
Transferrin	TRAN	B	1 day
Trichomonas vaginalis (Genital) Culture	TVAG	Blue Micro Swab	2 days **
Trichomonas vaginalis by PCR	TVPC	FCRU / PCR / TPV	2 days **
Triglycerides	TRI	B	4 hrs **
